

Hola, I'm a developer that loves clean & elegant { C O D E }

[si pues...en español también]

A little bit about me.

I've made my home base in Portland, Oregon with my small growing family. My journey into tech started with a degree in Fine Arts. As I started creating wedding invitations, business cards, a basic website, I was hooked and wanted to learn more about web development to expand the possibilities to combine creativity and tech.

That curiosity then opened a door that could never be shut. When I learned how to build my first website, I realized I found something that gave me the freedom & versatility I was looking for in my work. Now I've made a full switch to front-end development, where I can use my organization skills and eye for detail to write clean, elegant code.

Hand-Coded HTML

Well-Organized CSS

Easy Converting Designs Into Code

My focus is writing clean, well-formatted, semantic HTML5 by hand to make sure that the content is easy to read, easy to collaborate, trouble-shoot and accessible.

I pride myself on writing CSS that is easy to read and build on. I focus on keeping my CSS lean and fast to load, and I make it a habit to stay up to date on current best practices.

You can trust me to take a designer's PSD and quickly & accurately convert it into a webpage that is pixel-perfect match.

Like what you see?

Vamos a tomar una café.
